DETAILED ACTION

Election/Restrictions

Claims 2-3 and 7-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species of formula I, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/25/08. Please note that claim 7 is being withdrawn since it is dependent on both claim 4 and claim 2, and claim 2 was not elected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Chemical Abstract AN. # 1995:818045 CAPLUS or Chemical Abstract AN. # 2000:184161 CAPLUS or Chemical Abstract AN. # 1984:610054 CAPLUS.

The 1995:818045 CAPLUS abstract teaches a compound of tricyclo [3.2.1]octan-2-one, 1,8,8-trimethyl whereas CAPLUS Abstract 2000:184161 teaches a compound of tricyclo [3.2.1]octan-6-one, 3,3,5-trimethyl and the CAPLUS Abstract 1984:610054 teaches a compound of tricyclo [3.2.1]octan-2-one, 1,8,8-trimethyl.

Page 3

Claims 4-5 and 12-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chemical Abstract AN. # 1995:818045 CAPLUS or Chemical Abstract AN. # 2000:184161 CAPLUS or Chemical Abstract AN. # 1984:610054 CAPLUS.

The said abstracts have been described above and differ from applicant's invention in the following ways: 1) they do not directly teach (i.e. by way of a specific example) a compound that falls within applicant's claimed compounds of claims 4-5, 2) it is unclear the exact synthesis processes used to make said compounds as claimed in claims 15-16, and 3) there is not a direct disclosure to the use of said compounds to make flavor or fragrance compositions as set forth in claims 12-14.

It would have been obvious to one having ordinary skill in the art to use the disclosures of the references from which the said Chemical Abstracts were taken as additional motivation to makes compounds that fall within applicant's claimed compounds, and to make these by a method that reads on applicant's claimed method. The use of use ketones in flavor or fragrance compositions is deemed to be at once envisaged since these types of ketones are well known in the art to be highly aromatic, and ketones in general are well known fragrances.

Claims 1, 4-6 and 15-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over applicant cited Article XP-002254318 entitled: Regiochemical Trends in Intramolecular [2 + 2]

Photocycloadditions of 6-(Prop-2-enyl)cyclohex-2-enones and 5-(prop-2-enyl)cyclopent-2-eones, by Giuliano Cruciani et al..

The said Article is deemed to anticipate applicant's claims. In the alternative, if applicant's specifically disclosed compounds are not directly disclosed, they would have been obvious since they fall within the generic broad disclosure of ketone compounds taught by the reference. Furthermore, applicant's claims are deemed to be obvious over the generic disclosure of the document's method of making said ketone compounds.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant cited Article XP-002254318 entitled: Regiochemical Trends in Intramolecular [2 + 2] Photocycloadditions of 6-(Prop-2-enyl)cyclohex-2-enones and 5-(prop-2-enyl)cyclopent-2-eones, by Giuliano Cruciani et al..

The article has been described above and differs from applicant's claimed invention in that there is not a direct disclosure to the use of said compounds to make flavor or fragrance compositions as set forth in claims 12-14.

It would have been obvious to one having ordinary skill in the art to use the disclosed ketones in flavour or fragrance compositions since such is deemed to be at once envisaged since these types of ketones are well known in the art to be highly aromatic, and ketones in general are well known fragrances.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly

claiming the subject matter which the applicant regards as his invention.

Claims 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being

indefinite for failing to particularly point out and distinctly claim the subject matter which

applicant regards as the invention.

These claims are indefinite because they use the term "use" in the preamble of

claims which is not a proper statutory class of invention. These claims also lack a

definitive method step. As such, these claims are being withdrawn from further

consideration.

Examiner Information

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Examiner Joseph D. Anthony whose telephone number

is (571) 272-1117. If attempts to reach the examiner are unsuccessful, the examiner's

supervisor, Harold Pyon, can be reached on (571) 272-1498. The centralized FAX

machine number is (571) 273-8300. All other papers received by FAX will be treated as

Official communications and cannot be immediately handled by the Examiner.

/Joseph D. Anthony/ Primary Examiner, Art Unit 1796 4/28/08
